ANNUAL REPORT

OF THE

MEDICAL OFFICER OF HEALTH

AND

PUBLIC HEALTH INSPECTOR

FOR THE YEAR

1 9 7 1

Cwmaman Urban District Council,
Council Offices,
74 Cwmaman Road,
GLANAMMAN.
Garns.

ANNUAL REPORT FOR THE YEAR 1971

TO THE CHAIRMAN AND MEMBERS OF THE CWMAMMAN URBAN DISTRICT COUNCIL

Mr. Chairman and Members,

We herewith have pleasure in presenting to you our report on the Environmental Health of the Cwmamman Urban District for 1971.

The year under review produced no eventful problems to the Authority Services and from the Public Health aspect the year was a good one.

The Local Authority continued with its house building programme and thirteen units were completed during the period. In addition to these, twenty nine improvement grants at a total cost of £33,239. were undertaken by private individuals modernising their homes. It would appear from these figures that the older premises within the Urban District are being improved at a more satisfactory rate and that people generally are accepting and taking advantage of the grants so available.

Pollution is causing concern nationally and is very much to the fore both in the Daily Press and on Television. The subject covers contamination of air, water and land. In an area such as Cwmamman the problems are naturally different from those of a large city. It is obviously not subject to industrial pollution, but once again it is felt that comment is necessary with regard to the noise levels caused by heavy vehicular traffic travelling along the main road through the district, also when one considers environmental pollution, it is a matter of surprise and disappointment that litter and refuse continues to be dumped indiscriminately in an area which operates an efficient refuse collection service and provides throughout the district numerous litter baskets. One is at a loss to explain why this habit continues, since the placing of this material in a collection receptacle would in any case present to the offender less physical effort on his or her part.

In all areas dangers must be looked for and it behoves every authority both to find and to take all possible steps to remedy sources of pollution.

We would like to express our appreciation to the Chairman and Members of the Council for their interest in the work of the Public Health Department, and our thanks to Mr. J. D. I. Evans, Clerk of the Council, and all the Staff for their help and support throughout the year.

MARGARET STEANE.

Medical Officer of Health.

G. A. MAHONEY.

Surveyor/Public Health Inspector.

ANNUAL REPORT FOR THE YEAR 1971

TO THE CHAIRMAN AND MEMBERS OF THE CHICAGO URBAN DISTRICT COUNCIL

Mr. Chairman and Members,

We herewith have pleasure in presenting to you our report on the Environmental Health of the Chicago Urban District for 1971.

The year under review produced no essential problems to the Authority however and from the Public Health aspect the year was a good one.

The Local Authority continued with its house building programme and sixteen units were completed during the period. In addition to these, twenty nine improvement grants at a total cost of £33,339, were submitted by private individuals maintaining their houses. It would appear from these figures that the other premises within the Urban District are being improved at a slower rate than the houses, and this is due to the fact that the majority of the other premises are occupied and the improvement work is therefore more difficult to carry out.

Digitized by the Internet Archive
in 2016 with funding from
Wellcome Library

The subject covers to the fact that the majority of the other premises are occupied and the improvement work is therefore more difficult to carry out. In an area where the problems are naturally difficult to solve, it is obviously not subject to industrial pollution, but one again it is felt that constant in necessary with regard to the noise levels caused by heavy vehicle traffic travelling along the main road through the district, also when one considers environmental pollution, it is a matter of surprise and disappointment that litter and refuse continues to be dumped indiscriminately in an area which operates an efficient refuse collection service and provides thorough street cleaning. One is at a loss to explain why this habit continues, since the placing of this material in a collection receptacle would in any case present to the offender less physical effort on his or her part.

In all areas dangers must be looked for and it behoves every authority both to find and to take all possible steps to remedy sources of pollution.

We would like to express our appreciation to the Chairman and Members of the Council for their interest in the work of the Public Health Department, and our thanks to Mr. J. D. I. Evans, Clerk of the Council, and all the Staff for their help and support throughout the year.

No action was required under this Section
which enables persons in need of care and
attention to be removed to suitable premises.

##

SANITARY ADMINISTRATION

WATER SUPPLY

Throughout the Urban area supplies were maintained for the twelve months it being necessary from time to time to supplement the Authority's own sources by means of a bulk supply taken from the Loughor Joint Water Board. Chlorinating equipment at the reservoirs continued to function satisfactorily and the seventeen bacteriological samples submitted to the Public Health Laboratory service for examination proved satisfactory.

REFUSE COLLECTION

A twice weekly refuse collection continued to operate throughout the area. Some problems arose during the period at the refuse tipping site. These mainly concerned the drainage of sub soil water and it is becoming apparent that a new site will have to be obtained for the coming twelve months. During the period under review the Authority has decided to operate the plastic sack system of refuse collection and it is to be hoped that this will further increase the efficiency of the service and also lead to a more clean and hygienic means of collection.

DRAINAGE AND SEWAGE

It was found necessary to provide additional service water drainage at the rear of the new housing site at Hendre Road. With regard to the Local Authority's main drainage system, this continued to function satisfactorily. Treatment as members are aware is undertaken at the sewage treatment works at Garnswilt, which is under the control of the Joint Sewage Board.

SANITARY INSPECTIONS OF AREA

Number of Inspections made for Nuisance	30
Number of Informal Notices served	4
Number of Statutory Notices served	2
Number of Water Leakage Inspections	210
Number of Water Leakage Notices	8

MEAT AND OTHER FOODS

All meats sold within the Urban area are slaughtered elsewhere and subject to inspection at the respective points of slaughter. No complaints were received during the twelve month period concerning fresh meats sold in the area.

BAKEHOUSES

Number of bakehouses in the area registered	2
Number of inspections made	6

INFECTIOUS DISEASES

Number of houses fumigated after causes of infectious diseases	Nil
Number of houses fumigated upon request	7

CONTROL OF RATS AND MICE

This service continued to function satisfactorily throughout the period, all complaints being dealt with, and continuous inspection and treatment being undertaken. As in the past the indiscriminate tipping of rubbish at various points throughout the district, giving rise to concern, since such tipping of vegetable and animal matter tends to attract and harbour rodents.
